Status	Generated baseline — human review required

“ **Verification boundary:** This page combines platform design guidance with static evidence from the release. It does not prove that every detected interface is enabled, reachable, secure, or operational in the deployed environment.

Purpose

This book provides one maintainable page per platform component. Catalog intent is shown even when the component is not confirmed in the inspected distribution; release evidence and verification status are kept separate.

Contents

Section	What it contains
---------	------------------

Foundation & Data	Component purpose, interfaces, evidence and verification.
Command, Control & Collaboration	Component purpose, interfaces, evidence and verification.
Sensors & Spectrum	Component purpose, interfaces, evidence and verification.
Analytics & AI	Component purpose, interfaces, evidence and verification.
Networks & Simulation	Component purpose, interfaces, evidence and verification.
Investigation & Security	Component purpose, interfaces, evidence and verification.

How to maintain this book

Generated sections are replaced from release evidence on each run. Put reviewed corrections, deployment-specific facts, links and decisions in the Maintainer Notes area below the generated block. Mark pages as reviewed only after testing them against the named distribution and release.

Maintainer Notes

Add human-reviewed deployment notes, corrections, decisions, screenshots, and links here. Content outside the generated block is preserved on future runs.
