

Sensor and Radio Interfaces

Sensor and Radio Interfaces

Field	Value
Distribution	BSS — OpenC5ISR
Product	OpenC5ISR
Release	0.15.1
Deployment	<code>openc5isr.bss.dev</code>
Source	<code>/srv/bss/releases/OpenC5ISR-v0.15.0-20app</code>
Evidence	Sensor/radio term scan and adapter standard
Source fingerprint	<code>93926e8c834f1ed79c9017a4096f70c76d73ce4f870f104fbd0cf54b2bed50ee</code>
Status	Generated baseline — human review required

“ **Verification boundary:** This page combines platform design guidance with static evidence from the release. It does not prove that every detected interface is enabled, reachable, secure, or operational in the deployed environment.

Observed sensor/radio indicators

-------	----	---

Adapter contract

Area	Required definition
Device identity	Stable hardware/agent ID, type, firmware/driver and owner.
Registration	Network endpoint, capabilities, location/profile, coordinate frame and time source.
Control	Commands, limits, authorization, acknowledgement, safety and emergency behavior.
Data	Sample/product schema, units, rate, timestamp, calibration, quality and loss indicators.
Products	Derived track/image/spectrum/detection metadata and OpenFiles/OpenBus publication.
Health	Connection, clock, temperature/power, overruns/drops, calibration and storage.

Edge-processing rule

Keep raw high-rate data near the sensor when possible. Publish compact, timestamped, semantically typed products plus a governed reference to retained raw evidence. Make bandwidth degradation and product quality visible instead of silently dropping fidelity.

Maintainer Notes

Add human-reviewed deployment notes, corrections, decisions, screenshots, and links here.
Content outside the generated block is preserved on future runs.

Revision #2
