# Changes Since Previous Release

# Changes Since Previous Release

| Field              | Value                                                                         |
|--------------------|-------------------------------------------------------------------------------|
| Distribution       | BSS — OpenSOF                                                                 |
| Product            | OpenSOF                                                                       |
| Release            | 0.15.1                                                                        |
| Deployment         | <code>opensof.bss.dev</code>                                                  |
| Source             | <code>/srv/bss/releases/OpenSOF-v0.15.0-20app</code>                          |
| Evidence           | Optional static comparison                                                    |
| Source fingerprint | <code>cda583b42f2a0d296b268ab5b174932a378c8be6fb52ffa1af14af896e990f6e</code> |
| Status             | Generated baseline — human review required                                    |

“ **Verification boundary:** This page combines platform design guidance with static evidence from the release. It does not prove that every detected interface is enabled, reachable, secure, or operational in the deployed environment.

## Static comparison summary

No previous release was supplied. Run with `--compare /path/to/previous-release` to generate a static change inventory.

# Detailed changes

No comparison report is available.

## Review warning

A route or component can appear added/removed because of renaming, generated files, build layout or scanner visibility. Review source control and execute compatibility tests before publishing these differences as customer-facing release notes.

---

## Maintainer Notes

Add human-reviewed deployment notes, corrections, decisions, screenshots, and links here. Content outside the generated block is preserved on future runs.
