Field	Value
Distribution	WCT English — OpenC5ISR
Product	OpenC5ISR
Release	0.15.1
Deployment	openc5isr-en.wallacecorptech.com
Source	/srv/wct/releases/OpenC5ISR-v0.15.0
Evidence	Catalog intent plus component-scoped static evidence
Source fingerprint	63d2b1097707e25d666401cdc6362e395968600a40a08690210cd8c0b75fbf50
Status	Generated baseline — human review required

“ **Verification boundary:** This page combines platform design guidance with static evidence from the release. It does not prove that every detected interface is enabled, reachable, secure, or operational in the deployed environment.

Purpose

The analytics workbench and semantic pipeline capability for composing sources, transforms, models, decision gates and operational effects.

Operational value

Moves analysis from disconnected notebooks into repeatable pipelines that can directly inform tracks, tasks and operational decisions.

Differentiators

Semantic types and operational workflows guide model execution, reducing brute-force AI integration and allowing humans to place explicit decision gates.

Platform connections

- OpenData
- OpenKnowledge
- OpenLLM
- OpenTask
- OpenBus

Verification checklist

- Confirm the component is included and enabled in this edition/release.
 - Record its authoritative service, process/container, port, base URL and health endpoint.
 - Exercise its primary operator workflow and capture expected versus actual results.
 - Verify authentication, authorization, audit, error behavior and data handling policy.
 - Verify OpenBus/OpenKnowledge relationships and time/provenance metadata where applicable.
 - Document known limitations and the release in which they are corrected.
