Status	Generated baseline — human review required

“ **Verification boundary:** This page combines platform design guidance with static evidence from the release. It does not prove that every detected interface is enabled, reachable, secure, or operational in the deployed environment.

Purpose

This book provides a safe operational baseline for the named distribution. Replace placeholders with tested unit names, URLs, owners, thresholds and escalation paths.

Contents

Section	What it contains
---------	------------------

Service Control	Start, stop, restart and inspect the deployed services.
Monitoring & Assurance	Health checks, logs, audit and daily operational controls.
Continuity & Recovery	Backups, recovery and structured troubleshooting.

How to maintain this book

Generated sections are replaced from release evidence on each run. Put reviewed corrections, deployment-specific facts, links and decisions in the Maintainer Notes area below the generated block. Mark pages as reviewed only after testing them against the named distribution and release.

Maintainer Notes

Add human-reviewed deployment notes, corrections, decisions, screenshots, and links here. Content outside the generated block is preserved on future runs.
