

Data Formats and Contracts

Data Formats and Contracts

Field	Value
Distribution	WCT English — OpenC5ISR
Product	OpenC5ISR
Release	0.15.1
Deployment	openc5isr-en.wallacecorptech.com
Source	/srv/wct/releases/OpenC5ISR-v0.15.0
Evidence	File-format inventory and integration standard
Source fingerprint	63d2b1097707e25d666401cdc6362e395968600a40a08690210cd8c0b75fbf50
Status	Generated baseline — human review required

“ **Verification boundary:** This page combines platform design guidance with static evidence from the release. It does not prove that every detected interface is enabled, reachable, secure, or operational in the deployed environment.

Observed format indicators

Extension/format	Files
.json	76
.csv	21
.ttl	17
.xml	7
.rdf	4

Canonical data requirements

- Stable identifiers for entities, observations, tasks, products and events.
- Explicit units, coordinate reference, timestamps/time scale and uncertainty.
- Schema/semantic version and compatibility behavior.
- Source/provenance, confidence and processing lineage.
- Handling/releasability/retention metadata and object-level access controls.
- A compact event form plus artifact reference for large imagery, video or datasets.

Versioning rule

Prefer backward-compatible additive changes. Breaking changes require a new schema/semantic version, a transition period or adapter, explicit migration tests and release notes identifying affected producers and consumers.

Maintainer Notes

Add human-reviewed deployment notes, corrections, decisions, screenshots, and links here. Content outside the generated block is preserved on future runs.
