Status	Generated baseline — human review required

“ **Verification boundary:** This page combines platform design guidance with static evidence from the release. It does not prove that every detected interface is enabled, reachable, secure, or operational in the deployed environment.

Purpose

This book records what the generator observed in the named release and provides a place for reviewed release notes, migration requirements, known issues and approval decisions.

Contents

Section	What it contains
---------	------------------

Current Release	Release identity, scope, status and known verification gaps.
Release Evidence	File inventory, component coverage and generated-document coverage.
Change Analysis	Static comparison to a prior release when supplied.

How to maintain this book

Generated sections are replaced from release evidence on each run. Put reviewed corrections, deployment-specific facts, links and decisions in the Maintainer Notes area below the generated block. Mark pages as reviewed only after testing them against the named distribution and release.

Maintainer Notes

Add human-reviewed deployment notes, corrections, decisions, screenshots, and links here. Content outside the generated block is preserved on future runs.
